

Manufacturing Nation

Modernising
Light Industries

As an employer in the Light Industries sector, we are pleased to sign up to Community's Manufacturing Nation Checklist, and commit to:

Involving health and safety reps in meetings and conducting regular safety walks on site with reps.

Identifying any unsafe materials (ie asbestos, RAAC) in your workplace, and if present, taking action to remove them swiftly.

Modern machinery - undertaking regular checks on machinery to check it meets modern safety standards, and replacing ageing, unsafe equipment as soon as possible.

Modern facilities - making sure employees have readily available access to toilets, drinking water, first aid equipment and clean eating facilities.

Modern working conditions - taking action wherever possible to ensure that lighting and temperatures in workplaces are comfortable, and that exposure to dust is minimised (including through the provision of appropriate PPE equipment where applicable).
